Career Objective

Ambitious and self-driven **junior software engineer** with a strong foundation in **HTML, CSS, JavaScript, React.js, Next.js, Tailwind CSS, and TypeScript**. Experienced in building responsive and scalable web applications with clean, reusable code and modern UI design principles. Seeking to contribute to a dynamic development team, grow into a **full-stack software engineer**, and create impactful digital solutions through innovative software development.

Experience

Supported website development using **WordPress** and modern web technologies.

Contributed to **AI tool integration** and responsive design improvements.

Projects

Product Landing Page – Clothing Brand - Creator

Designed and developed a responsive landing page for a clothing brand using HTML, CSS and JavaScript

Implemented a modern and user-friendly UI to showcase products effectively

Optimized the page for performance and mobile responsiveness

Travel Planner – Creator

Created a web-based travel planning application to help users organize trips efficiently

Developed interactive features using JavaScript, ensuring a seamless user experience

Integrated structured layouts and styling with CSS for a visually appealing design.

Daily Tracker – Creator

Built a responsive web app to track daily tasks and habits.

Implemented task creation, progress monitoring, and state management.

Designed a clean UI with reusable components for scalability and maintainability.
